Undergraduate Course Outline

MINE4710 Mine Management

Dr Carlito Tabelin

1.

This course aims to equip the student with an appreciation of management principles and practices vital to a mine manager's successful running of a mining enterprise. In addition, there will be a number of topics of special focus relating to risk and safety, economic development, optimum resource utilisation, environment and community.

At the conclusion of this course, students should be able to:

- 1. Recognise that mine management is a holistic process
- 2.

6. ASSESSMENT CRITERIA

The assessment criteria provide a framework for you to assess your own work before formally submitting major assignments to your course convenor. Your course convenor will be using this framework to assess your work and as a way to assess whether you have met the listed learning outcomes and the graduate attributes for your program. We ask that you do not use the assessment criteria guidelines as a checklist, but as a tool to assess the quality of your work. Your course convenor will also be looking at the quality, creativity and the presentation of your written assignment as they review the framework. Rubrics, wherever applicable, will be provided at the time of the assignment release.
