

Contents

1.	Search for Materials	2
2.		

3. Edit Material – General Information

Fill in details of the material in each tab as much as possible:

SDS: Add attachment of Safety Data Sheet (SDS).

Identifiers:

Material Type: Biological, Mixture, Pure chemical

Material Class: Chemical, Chemical do not create ontainer, Lab supplies

Structure Identifiers: CAS number or MDL number

Physical Properties:

Formula

Physical State

Molecular Weight

Purity: concentration of material

Density (Kg/L)

The screenshot shows the 'Edit Material' interface with the following fields and sections:

- Name:** 10 GBq F-18
- Material Type:** (Dropdown menu)
- Material Class:** Chemical
- Creator:** To, Linh
- Status:** Not Reviewed
- Material Source:** (Text field)
- Reviewed By:** (Text field)
- Formula:** (Text field)
- Density (Kg/L):** (Text field)
- Specific Volume:** (Text field)
- Solubility:** (Text field)
